- Company Branding
- This page is a simple portal into the system, so should be minimal
- We originally planned on having a email password feature (which we can still do). However, if we want to save a bit of dev time we could just have them contact a system admin if they forget their password, since there aren't too many people who will be using this system.

MY PROJECTS

APPROVED

- The Project page will be the default screen that Users will arrive on when they log in.
- Users can sort the data by clicking on the column headings. Clicking a second time will keep the same sorting but reverse the order. The default sorting will be newest created to oldest. This sorting will be used throughout the site on any spread sheet.
- UI should experiment with icons for headings and information to simplify the spreadsheet.
- Clicking anywhere (except the client name) on a row will take the User to the Project Detail page.
- If the project's status is 'draft' they will taken to the new/edit project page.
- Clicking company names will take Users to the client detail page.

CREATE NEW PROJECT

APPROVED

- If the User clicks on the 'Create New Project' button then the screen will dim and an overlay will drop down. (This also applies to the 'create new project button' on the Dashboard screen.)
- The User can choose to start a new project form scratch, or to copy an existing one.
- The User can cancel and get back to the Projects page by clicking anywhere else on the page (except main nav - which is still active)

The wireframe shows a dashboard with a top navigation bar containing 'MY PROJECTS', 'ARCHIVE', 'CLIENTS', 'AGENTS', and 'ADMIN'. On the right side of the top bar are links for 'New Project' and 'Log out'. Below the navigation bar is a main content area with a 'MY PROJECTS' heading. A modal overlay is open, showing two buttons: 'NEW' and 'COPY'. To the right of the modal is a 'CREATE NEW PROJECT' button. Below the modal is a table of projects with the following columns: Project Name, Created, Client, Task Type, Available, Assigned, Locations (To Approve, Approved), Due, Done, and Status. The table contains 20 rows of project data. At the bottom right of the table is a pagination control showing '1 4 5 6 12' and a 'view all' link.

Project Name	Created	Client	Task Type	Available	Assigned	Locations To Approve	Approved	Due	Done	Status

COPY PROJECT

APPROVED

- If the User chooses to copy an existing project the dropdown will change to include a search bar and cancel button (to go back to previous state)
- The box will expand to show a dynamic search result which will change results as the User continues to type.
- The User can sort the results by Name, Company Name, Task Type, Newest to Oldest, or Oldest to Newest.
- When the User finds the right project they click the 'copy' button next to it.

The wireframe shows a project management interface with a 'COPY PROJECT' modal. The modal contains a search bar, a 'cancel' button, and a list of project suggestions. The background shows a table of projects with columns for Project Name, Created, Company Name, Task Type, Locations (Available, Assigned, To Approve, Approved), Due, Done, and Status.

Project Name	Created	Company Name	Task Type	Available	Assigned	To Approve	Approved	Due	Done	Status

APPROVED

- The User will be brought to this screen by creating a new project from scratch or after copying an existing project.
- If they copy an existing project then all fields except 'project name' and 'due date' will be pre-populated.
- 'Project Name' at the top of the screen will update dynamically as the User enters a name into the corresponding field.
- To create a task the User drags a block from the left side of the task creation area and drops it into the work board.
- Blocks are broken into three categories: Question, Media and Message.
- Blocks will have an icon to the left of the name (seen as grey square) making it easy to visually distinguish between them.
- The User can save the project as a draft (making the project status 'draft'). This will take them to the Projects page.

WIRE FRAMES

NEW / EDIT PROJECT - QUESTION BLOCKS

APPROVED

- After a user has created a mini-quiz the box will display the questions and a simple edit link, which will take the user back to the Mini Quiz creator.
- As Users add more locations the box will expand to show the list.
- Users can delete locations, but can not edit them.
- Blocks have two modes, standard and edit. When the User drops a block in, it will default to edit mode.
- When the user mouses over a standard mode block then an edit icon appears on the right. They click on the icon to edit the block.
- The done button (seen as check mark icon) will always be visible in edit mode blocks. When clicked it will switch the block to standard mode.
- Users can have multiple blocks in edit mode simultaneously.
- Single and Multiple Answer blocks will have a field for the question and 3 answer fields by default.
- The User can add or remove more answers as needed.
- True or False and Written Answer questions will only require a question field.

WIRE FRAMES

NEW / EDIT PROJECT - MEDIA BLOCKS

APPROVED

- The User can request media submissions from the Agent by using the media Blocks
- All Media blocks only require a quick description of what is needed.
- If the User wants to convey more info to the Agent they can use an embedded Message Block.
- All blocks have a grabbing section on the left-hand side. The User can re-organize the blocks by dragging them to the new location.
- Blocks are deleted by dragging them outside of the workspace.
- When the block leaves the workspace a delete icon is overlaid on the block and the block disappears when the user releases the mouse button.
- The minimum # of media will be set to 1 by default.

The wireframe shows a project management interface for 'MyTask'. At the top, there is a navigation bar with 'MY PROJECTS', 'ARCHIVE', 'CLIENTS', 'AGENTS', and 'ADMIN'. A 'New Project' link and a 'Log out' button are on the right. The main header displays the project name 'THIS IS THE NAME OF A REALLY GREAT PROJECT' and the creation date 'created: 21/10/2012'. Below this are three buttons: 'CREATE PROJECT', 'SAVE DRAFT', and 'CANCEL'.

The interface is divided into several sections:

- PROJECT INFO:** A form with fields for 'Project Name', 'Client' (with a dropdown and 'NEW' button), 'Task Type' (with a dropdown), 'Task Title', 'Description', 'Due Date' (24/07/2012), 'Budget' (\$1,550), and 'Other Notes'.
- MINI QUIZ:** A section titled 'Your Quiz Contains 8 Questions' with an 'edit' link and a list of four quiz questions.
- LOCATIONS:** A form with fields for 'Location Name', 'Price (\$)' (15), 'Due' (24/07/2012), 'Address 1', 'Address 2', 'Country' (with a dropdown), 'City', 'State/Prefecture' (with a dropdown), and 'Zip'.
- Media Blocks:** A central workspace containing a list of media blocks on the left and a larger area on the right for editing them. The blocks include:
 - Single Answer:** Only one answer per question.
 - Multiple Answers:** Select one or all answers.
 - True or False:**
 - Written Answer:** Type in answer. Use to request notes.
 - Take a Photo:**
 - Take a Video:**
 - Record Audio:**
 - Note:** Add a message to the Agents.
 - Attach a File:** Add an image, pdf, video or mp3.The right-hand area shows three media blocks being edited, each with a title, a description field, and a 'Minimum #' field. The first is 'Photograph, Video or Record Something Super' with a 'Photo: What should they take a photo of?' question and a minimum of 3 photos. The second is 'Video: What should they take a video of?' with a minimum of 1 video. The third is 'Audio: What should they record?' with a minimum of 1 recording.

A note at the bottom states: 'Note: Message blocks can be attached to Question and Media Blocks, or stand alone.'

WIRE FRAMES

NEW / EDIT PROJECT - MESSAGE BLOCKS

- Message blocks allow the User to give information and guidance to the Agent.
- Message blocks (only) can be embedded within other blocks (including other message blocks), by dragging and dropping them into the desired block.
- Message blocks don't have to be embedded, though, and can alone and function like the other blocks.
- Note blocks have the same functionality as the comment tool in basecamp. This includes bold, italics, bulleted lists and numbered lists. Unlike basecamp, however, the text box will expand its height dynamically in order to show all text.
- Attach a File Blocks allow the User to share media files with the Agent within the task. These include basic image formats (jpg, png, gif, bmp, etc.), PDFs, audio (mp3 only?), and video. (Type of files, server requirements, etc. should be discussed with the dev team to see what is possible)
- Users can attach files by dropping them from their OS to the block or by clicking on the link to navigate through the OS finder.
- Only one file is allowed per block. The User can add as many Attach a File blocks as they like, however.
- Once added the block will switch to standard mode with a loading bar. When the file is finished uploading, the bar will be removed.
- The User will be able to cancel the upload by clicking the X next to the bar. The block will be returned to edit mode.
- Attach a File Blocks do not allow editing after a file is uploaded. The User must delete the block and add a new one.
- If the User navigates away from the page while a file is still uploading they will be given a browser warning telling them what they are doing and asking if they want to finish uploading the file or stop it.
- Users can add as many message blocks to other blocks as they like. And because all blocks can be easily rearranged by dragging them into place the User can structure their message however they see fit.

Add an image, pdf, video or mp3

Note: Message blocks can be attached to Question and Media Blocks, or stand alone.

Can you believe how cool this is?

Message blocks can be attached to any other block. This allows the organizer to give more that will help the Agent answer to the question or record the media.

Can you believe how cool this is?

Messages blocks will have the same functionality as a dashboard comment box. This means that the User can use:

- **Bold**
- *Italics*
- Bulleted lists
- 4. and Numbered lists

The box differs from dashboard, however, in that the text field will expand to hold show all content, rather than having a set height. The default height will be 3 lines of text.

Photograph, Video or Record Something Super

Note blocks are are very handy in giving extra information about what the Agent should photograph, video or record. How many photos, what angles, etc.

And don't forget that Message blocks don't have to sit in another block. They can be independent!

Does boolean logic rock?

WIRE FRAMES

NEW / EDIT PROJECT - CREATE MINI QUIZ

APPROVED

- When the User clicks on the 'Add a Mini Quiz' button or edits an existing mini quiz, the screen is faded and this overlay drops down.
- The Main navigation will not be active for this screen.
- The User can create up to 4 single answer questions. They add questions by clicking on the question blocks, which will switch to question edit mode.
- Clicking the X in edit mode will return the question to inactive mode. They can also drag the box out of the work area to do the same thing.
- For all questions the User must choose a correct answer so the Agent's score can be tallied instantly.
- If the User hits the 'Done' button without supplying all the needed information then they will be given a browser warning. They will remain on the page and the needed fields will be highlighted.

WIRE FRAMES

PROJECT DETAIL

- If the project is 'Pending' and can still be edited then an edit icon will appear next to the status (shown for placement purposes only) and the user can go to the Create/Edit screen by clicking on that.
- When the User hovers over a row in the Locations list the row will highlight slightly. If an agent has not yet been assigned then delete, map view, and edit buttons will appear (the User can only edit the budget and due date). If an agent has been assigned, then only the map view button will be displayed.
- The Agent Information box will also populate as the user hovers over a row. If an agent is not assigned yet, then it will remain blank.
- If the location requires agent approval and multiple agents have applied then the Agent Info will swap between their info when the user hovers over the individual names. It will default to the agent on the top of the list when hovering elsewhere in the location list.
- The User can perform bulk actions (make locations available & approve agent submissions) by selecting as many check boxes as they like and then clicking on the appropriate text button above the spread sheet.
- If no check boxes are selected then the bulk actions are will be grayed out.
- Clicking on the delete icon will bring up an overlay confirming their decision.
- Clicking on the map icon will bring up a map overlay.
- Clicking on a Location name will take the user to the Location Detail screen.
- If the User has requested to approve the agent then they can approve or deny any claims from here. Denying an agent will remove them from the list. Approving one of them will assign that agent to the location and all other claims will be discarded.
- Clicking on an Agent name will take the user to the Agent Detail screen.
- Hovering over a note will show edit and delete icons for that note. These options will only appear for admins and the writer of the note. We may also want to consider removing this option (not for admins) for notes over 1 week old.

SOME PROJECT DETAIL OVERLAYS

APPROVED

- All overlays will act the same way, sliding down from under the main navigation.
- 'Add a Location' will appear when the user clicks the 'new location' button.
- The User must enter the Location Name, Price and Due Date.
- For the location they can choose to enter the address via the input fields or to drop a pin on the map.
- When the User has entered sufficient information the map will place a pin on the location indicated by the input fields.
- To drop a pin the user can grab, drag and drop the pin icon. Or they can click on the icon or "drop pin", highlighting it" and then click on the desired location on the map.
- When they are ready the User will hit the "Add Location" to add it to the list.
- 'Select an Agent' will come down if they click the 'Request Agent' link.
- General confirmation and warning messages will use this format as well.

EDIT EXCEL UPLOAD

APPROVED

- If a user chooses to upload an excel document with location information they will first be given a browser window to find the file.
- The system will take the info and create locations based on it.
- If the file is not usable then the system will alert the User via a warning drop-down.
- If the system finds errors it will highlight the bad areas as well as the location box it is contained in.
- The User can then click on the different boxes to swap the info shown on the top and correct/edit the fields.
- The data will update instantly in the location boxes below as they User types in new data in the input fields above.
- If a location is no longer wanted then the User can delete it via the 'Delete Location' button, which will remove it's box from the bottom.
- The User can add another location manually by clicking on the 'Add Another Location' box.
- When they are done they click the 'Add Locations' button at the top.

LOCATION DETAIL

APPROVED

- The User arrives at this screen by clicking on the Location Name in the Project Detail screen.
- They can return to the Project Detail screen by clicking on the project name above the location name.
- The mobile app will send data to the system, whether or not the project is completed.
- Because of this the User can view partially completed projects as well as finished.
- The 'This Location is Done' approval bar will only appear if the project is submitted and not yet approved by the organizer.
- The User will not be able to edit anything on this screen, but can view images and video, listen to recordings, and write notes.

TASK TITLE 100% COMPLETE

Can you believe how cool this is?
3. Agent's Answer

What if they haven't answered it yet?
Then there is no answer, of course.

Is it true or false?
True

How you you respond to a written answer question if you really had to?
Mauris zelus in pagus comis abico ex, praemitto, pagus feugait incassum, valde illum. Fere iusto validus antehabeo exerci, immitto vulputate luptatum delenit persto genitus vulputate. Torqueo gemino, dolore similis dignissim, reprob nulla ne, caecus ad vindico meus feugait. Quibus feugiat foras in feugiat praesent quis, tation, portineo jus. Ea nimis commodo molior quae indoles.

Take some pictures (3 minimum)

How would a multiple answer question look?
1. The first answer 3. The second one 4. And a third

Take a video of something truly stunning

- Users can also edit contact info in the contacts list by clicking on the edit icon after hovering into the list item.
- When the User enters in the information and then hits the 'Add Contact' button, the new contact will instantly be added to the list.

WIRE FRAMES

MAP OVERLAY

APPROVED

- The Map will come up any time the User clicks on the location icon (seen in wireframes as a pin) next to a location name or address anywhere on the site.
- The Map will have basic functionality. (zoom, pan by dragging, etc.)

WIRE FRAMES

AGENTS

APPROVED

- The User can filter down the agent list by searching specific columns.
- By searching multiple columns the list is refined even more.
- Search fields will by default be populated by the column headers (Agent Name, Region, etc.). Once the User enters a new search term then it will replace that text and a clear button will be added to the left side of the field (see the Region search field).
- Clicking on the Agent's email address will pull up the User's email application with the 'To' field populated.
- The same will be true if the alternate contact is an email address.
- Clicking anywhere else on a list row will take the User to the Agent Detail screen.

AGENT NOTES

[ADD NOTE](#)

28 Nov '12 by User Name

This is an area for the Organizer to makes notes on the project. They can edit or delete the note by hovering of it to reveal the icons and then clicking on them.

- Clicking on the edit icon by the Agents name will bring down an Edit Agent Info dropdown.
- Webmoney account numbers will not be visible in full to all users. Admins will see the whole number and everyone else will see only the last 3 digits.

WIRE FRAMES

EDIT AGENT

APPROVED

- Not all info is editable by everyone.
- Admin can edit all fields other than birthday (because it should not change) and travel distance (because it is dictated by the Agent).
- On top of that, Organizers will not be able to edit the Agent's name or webmoney account number.
- Other roles will have varying degrees of control.
- Editing the agent info will change the account info on the Agent's phone as well.

- Only Admins will be able to see the Admin section. Other users will not even see the link in the main navigation.
- Users are people who have accounts with the backend system.

WIRE FRAMES
NEW / EDIT USER

APPROVED

The wireframe shows a web application interface for user management. At the top, there is a navigation bar with the 'myTask' logo and menu items: MY PROJECTS, ARCHIVE, CLIENTS, AGENTS, and ADMIN. On the right side of the navigation bar are links for 'New Project' and 'Log out'.

The main content area is divided into two sections. On the left is a table titled 'USERS' with columns for 'User Name', 'Role', and 'Language'. The table contains several rows of user data. On the right is a 'NEW USER' modal form, which is currently open and centered over the table. The modal has a 'cancel' link in the top right corner and a 'NEW USER' button in the top right corner. The form contains the following fields:

- First Name (text input)
- Last Name (text input)
- Role selection: Support, Organizer, Admin
- Email Address (text input)
- Phone # (text input)
- Alternate Contact (text input)
- Language (dropdown menu)
- Address 1 (text input)
- Address 2 (text input)
- Country (dropdown menu)
- City (text input)
- State/Prefecture (dropdown menu) and Zip (text input)
- User Note (text area)
- CREATE USER (button)

The 'NEW USER' modal is overlaid on the 'USERS' table, which is partially visible behind it. The table data includes columns for 'User Name', 'Role', 'Language', 'Street Address 1', 'Address 2', 'Country', 'City, State/Prefecture Zip', 'agent@gmail.com', '123.456.7890', and 'another@contact.com'.

- This overlay will appear when the user clicks the 'New User' button or the edit button on the User Detail screen.

THANK YOU
