

DETEC NEXT PRO SOFTWARE PACKAGE

Get started with Detec Next PRO
software package!

BROCHURE

Detec Next is the term being used on a new generation of video surveillance software from Detec AS. Detec Next is a user-friendly, flexible and scalable software that you can easily extend with the exact number of cameras, servers and client machines you need in a system.

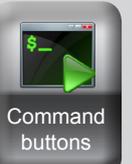

With Detec Next PRO Software Package, you are well underway in building a new professional Detec Next system with the possibility of creating a range of adaptations customized to each scene. The package consists of:

- License key for Detec Next Software
- Detec Next PRO camera/module license
- Database structure for storage of recordings
- Detec Next Client license

FEATURES IN DETEC NEXT PRO SOFTWARE PACKAGE

LEVEL	PRODUCT	BELONGING KEY FEATURES	PART NUMBER
Detec Next Software - new system			
		 Client license  License key  Setup-mode  Status-mode  Help  Live-mode  Sorted camera list  Map-mode  WEB-solution	DTC-KEY-USB/SW
CAMERA/MODULE (number of units - price per connected IP-address)			
	Detec Next PRO Camera/Module License	 Open IP-standard  PTZ-control  Command buttons  Heatmap-mode  Alarm-mode  PRO module license  Prioritized alarm list  Advanced schedule  PTZ guard tour	DTC-SWN-PRO1
SERVER - STORAGE SOLUTION			
	Database Structure for Storage of Recordings	 Database structure  Multiple disk sets  Playback-mode  Archive-mode  User control  Activity log	DTC-SWN-STORAGE1
CLIENT (number of units - price per connected monitor)			
	Detec Next Client License	 Client-license  Setup-mode  Status-mode  Help  Live-mode  Sorted camera list  Monitor matrix  Map-mode  WEB-solution	DTC-SWN-UI1

SYSTEM DRAWING

WHAT CHARACTERIZES THE USE OF DETEC NEXT PRO?

- The customer has CCTV-operators who are professional and dedicated in their work
- The customer wants a system that gives warnings on particular types of events in real-time
- The customer often has a clear opinion on what type of events are undesired
- Normally, the scene has little activity, or activity of such a character that undesired events are easy to extract
- There are requirements to the system to extract real events and a low false alarm rate is expected.
- A short response-time is of essence, and certain actions in the system are expected to be carried out automatically
- The system must be able to send alarms to mobile clients and guard centers both manually with operators and automatically, and alarm management should be time-controlled
- If there are busy areas of interest, where multiple alarms simultaneously are expected, automatic priority on alarms are desired in order for operators to know what to focus on
- Often, the customer have demands to extract reports on events and logs on what actions operators have taken
- Video evidence and archiving of sequences will be of high importance to document and investigate events

In many cases, a customer will also use Detec Next PRO as a tool for analyzing events that have already happened. Then, the system will be less dependent on rapid response, but the demands to video analysis and reporting are equally important.

TYPICAL AREAS OF USE

Perimeter security, e.g. by prisons, ports, military facilities

Power plants and substations

Industry

Part no.: DTC-PK-PROx

Offshore/onshore flare surveillance

Offshore/onshore oil and gas leakage detection

Compatibles/Accessories:

- Detec Next Core Camera/Module License (DTC-SWN-C1)
- Detec Next Advanced Camera/Module License (DTC-SWN-A1)
- Detec Next PRO Camera/Module License (DTC-SWN-PRO1)
- Detec Next RAD Camera/Module License (DTC-SWN-RAD1)
- Detec Next Database Structure (DTC-SWN-STORAGE1)
- Detec Next Client License (DTC-SWN-UI1)
- Software Update Agreement Detec Next PRO kamera-/modullisens (DTC-AGR-PRO1)

System Requirements:

Microsoft Windows 7/ Server 2012 R2, 32 or 64 bit
Core i7 processor, 8GB RAM or better.
Monitor board for processing of algorithms recommended - see www.detec.no.

ABOUT DETEC AS

Detec AS was established in 1981 and develop and promote products for video surveillance. More than 30 years experience is your guarantee of a professional partner in the security industry.

Detec AS is Norway's leading developer of software for video surveillance and analysis. Detec AS started with software development in the early 90s and has since the start had a close collaboration with leading research communities on video analysis technology. This co-operation emphasize the importance of our efforts on advanced technology and products, meeting the international requirements of tomorrow.

Detec AS is also a leading distributor of video surveillance equipment in its home-market Norway, and is representing renowned brands such as Sony, HikVision, Arecont Vision, JVC, CBC, Fujinon, Fujitsu and more.

Detec AS has an extensive network of partners consisting of technology partners, suppliers and dealers. Together we can offer complete and tailored security and video surveillance systems to a broad range of different end-users.
